

ALPHAPEPE (\$ALPE)

BETAS DON'T MAKE IT SO FAR

**Congrats. You're probably 0.01%
smarter than your friends.**

WHITEPAPER

From Frog to Phenomenon.

Not just another frog. The alpha of frogs.

AlphaPEPE was born from **pure degen instinct**. While normie frogs scroll TikTok, AlphaPEPE **lifts charts and slaps sell buttons**.

It's not just a token — **it's a statement**. It's **strength, meme-power**, and **cult appeal** packed into a green digital beast.

**LEG DAY IS
FOR NORMIES.
ALPHA LIFTS
CHARTS.**

BULLSHIT OR NOT?

Here's how the magic money printer actually works.

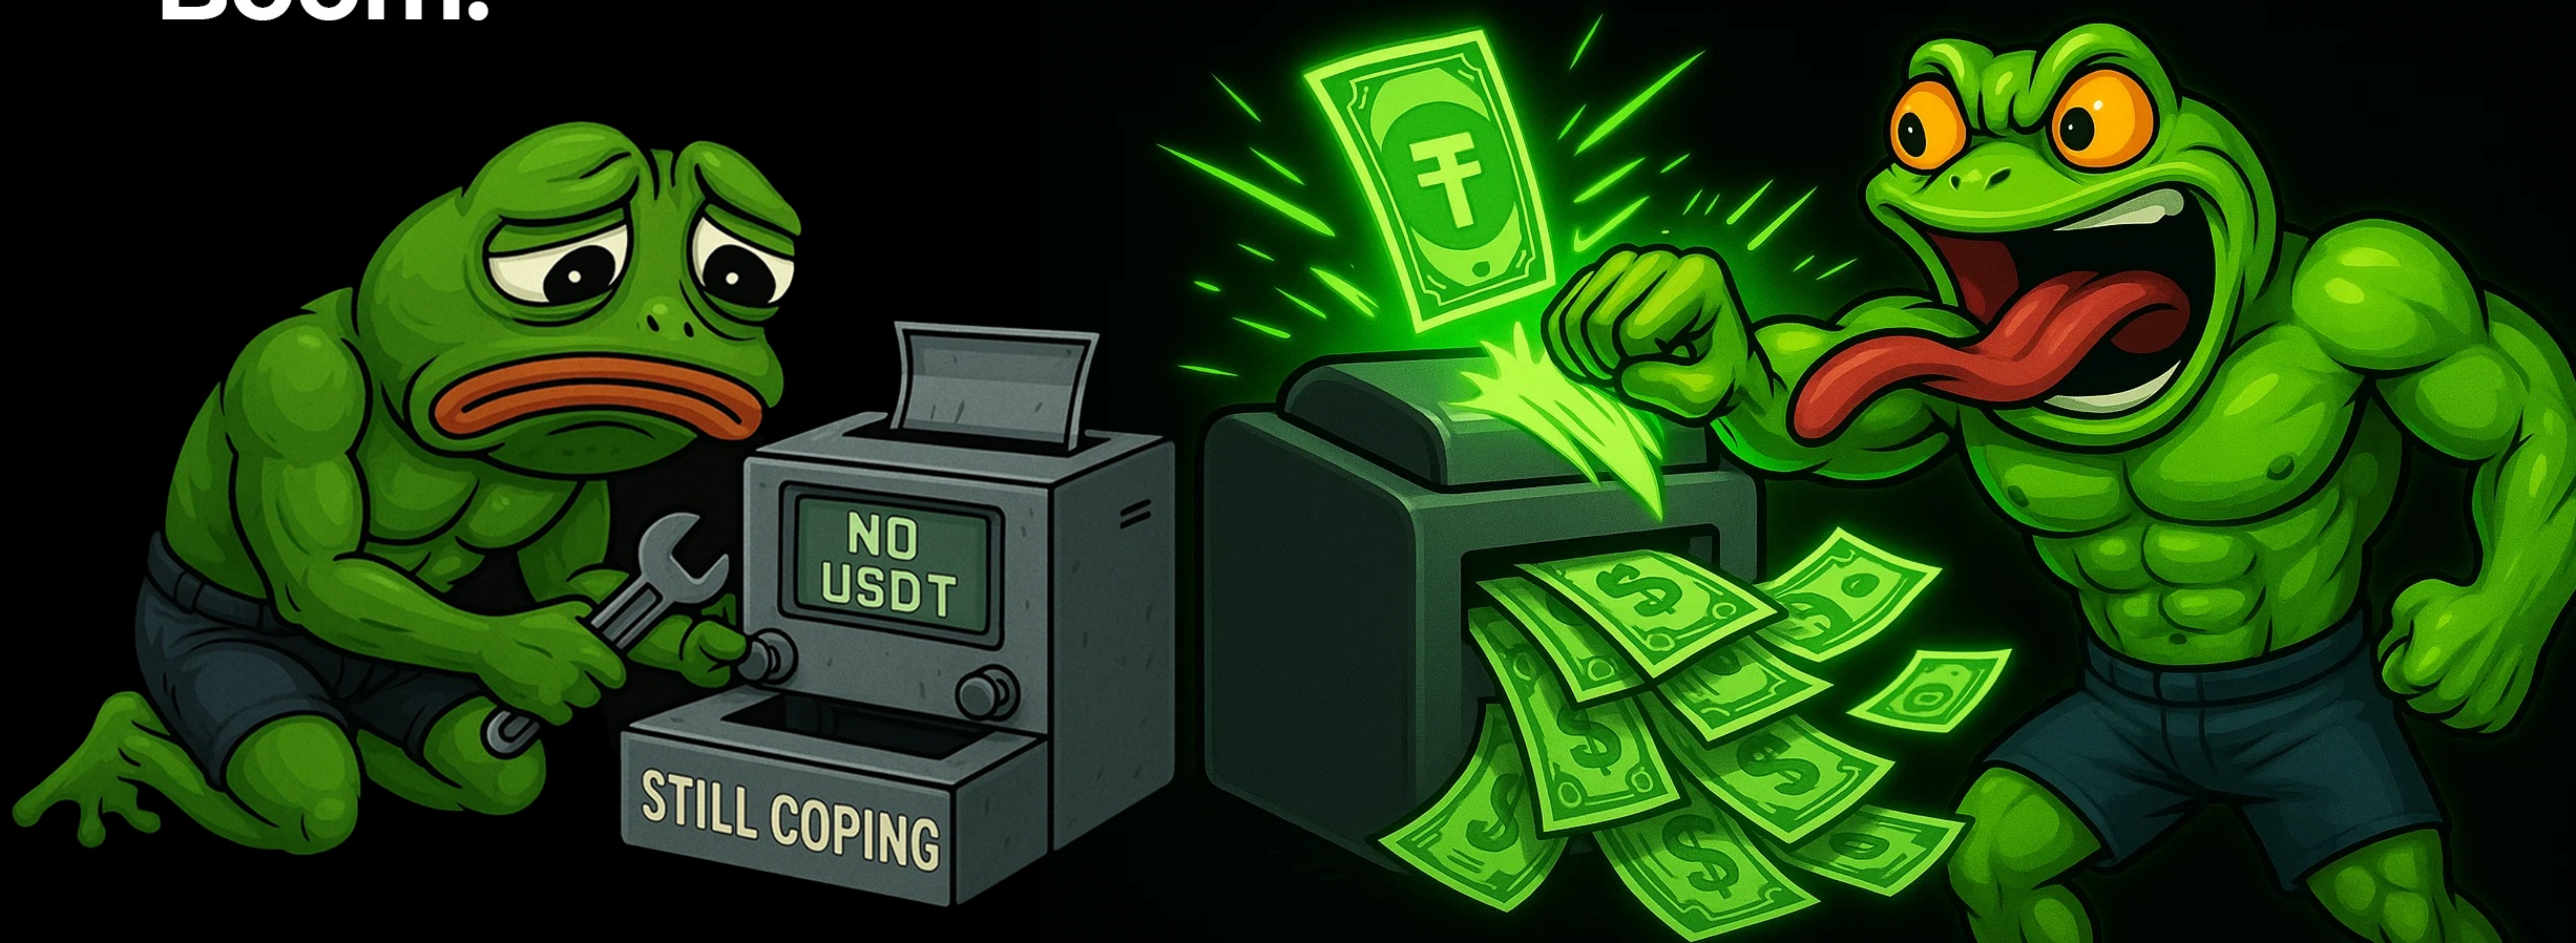

Every month, the **AlphaPepe machine** goes **BRRR**.

We set a **Pool Rate** — for example, **5%** — and that % of total monthly buys gets dropped into the **USDT Reward Pool**.

Example time, nerds:

If the cult raises **\$100,000** in AlphaPepe buys this month, the pool gets \$5,000 in USDT.

Boom.

80 % OF THE POOL

**NOT FINANCIAL
ADVICE,
BUT IT'S
WORKING.**

The background of the top section is a dark, stylized illustration of the Pepe the frog meme character. AlphaPepe is depicted with a large, muscular green body, a wide-eyed, intense expression, and a red tongue sticking out. He is surrounded by stacks of US dollar bills and a large, ornate safe wheel on the right side. The overall tone is dark and mysterious.

YOU ALREADY KNOW.

CZ nods. AlphaPepe delivers.

Mememes don't usually pay. This one does.

DISCLAIMER

This whitepaper is for informational and entertainment purposes only. Nothing in here is financial advice, a trading recommendation, or legally binding in any jurisdiction (including Degenland). It's mostly memes, with a bit of math.

1. Risk Warning

Buying \$ALPE might make you laugh, make gains, or make losses. Crypto is volatile. Prices go up, down, or sideways — often all in the same hour. Don't invest more than you're willing to lose. Also, never trust a frog with financial advice. Especially this one.

2. No Promises

AlphaPepe does not promise riches, moons, or Lambos. We don't guarantee profits, price action, or reward drops. What we do guarantee is zero VC wallets, zero team tokens, and peak meme energy.

3. Decentralized and Unruly

This is a community-led, blockchain-based experiment. There's no central authority. No CEO. Just frogs and fire. The roadmap is vibes. The outcome is chaos. Participation is voluntary.

4. Legal Stuff

Laws vary by country. Make sure you're not doing anything illegal where you live. We're not lawyers. If you're unsure, go ask one. Then maybe ask two more.

5. Liability

AlphaPepe, its creators, community, and cult members are not liable for any gains, losses, trades, apes, paper hands, or emotional damage caused by participation.

6. Forward-Looking Memes

Any goals, projections, or memes about the future are just that — memes. Actual results may vary, especially in crypto. Probably will.

By reading this, you agree to accept full responsibility for your own decisions.

You've been warned. You've also been entertained. 🐸
